ENGINEERING

MORE THAN MEETS THE EYE

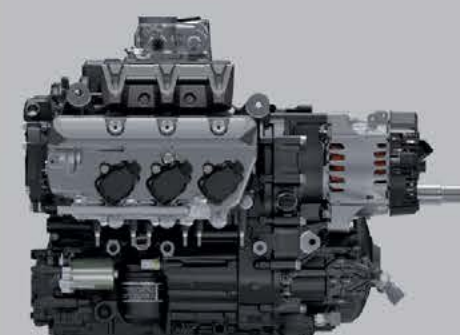

AT THE HEART OF EVERY GREAT MOTORCYCLE BEATS A GREAT ENGINE.

A new, horizontally-opposed, 1,833cc flat six engine, punches out 170Nm of torque @5,500rpm. Now, 6.2 Kg lighter, with 4 valves per cylinder and Unicam heads, you get strong eager performance out on the highway, as well as a delicate throttle response when you need it around town.

DUAL-CLUTCH TRANSMISSION (DCT)

The Gold Wing Tour is available with a brand new 7-Speed Automatic DCT. No shift or clutch levers – all your shifting is controlled by buttons on the handlebar. Or you can let the DCT function fully automatically, and the bike will upshift and downshift effortlessly.

STRENGTH AND STABILITY

A much lighter, all-aluminium die-cast beam frame, together with an all-new double wishbone front suspension system means it's 30% smoother, more agile and delivers a real plush ride wherever you go.
